

1 **Abstract of Disclosure**

2 A wrench includes a pipe, a lever, a first wedge, a second wedge, an
3 elastic element, a counter and a sensor. The lever includes a portion put
4 in and pivotally connected with the pipe. The first wedge is attached to
5 the portion of the lever. The second wedge is in contact with the first
6 wedge. The elastic element is for biasing the second wedge against the
7 first wedge. The counter is installed on the pipe. The sensor signals
8 the counter every time it senses movement of the first wedge past the
9 second wedge.
